

Fluent 5 Scheme

All children in Years 1 - 6 have 5 questions everyday to answer in 2 minutes.

Questions are of all the 4 operations and also include fractions, decimals and percentages.

These get progressively harder as the year moves on.

These are evident in books either stuck in on a sheet or written.

Example:

Day 84 Fluent Five	
1	$= 34 + 44$
2	$41 - 9 =$
3	$= 7 \times 10$
4	$40 \div 5 =$
5	$7 + 4 + 7 =$
